HG eco oven cleaner

- Packaging made of 100% recyclable materials.
- **FREE FROM** preservatives, phosphates, phosphonates and microplastics.

HG eco oven cleaner quickly and effectively removes burnt-in and caked-on grease from ovens. It simply leaves a shiny oven! This product is also suitable for stainless steel hobs, grills and barbecues.

HG eco oven cleaner is a sustainable cleaner. HG eco products are free from preservatives, phosphates, phosphonates, colourings and microplastics. Ingredients such as allergens, parabens and chlorine are also excluded from the HG eco range. Packaging made of 100% recyclable materials. In brief: HG eco products are sustainable products, but with the familiar HG performance and effectiveness!

Instructions: Push in the nozzle on the front and turn a quarter turn. If you have used the bottle before, remnants of the liquid may be left in the nozzle, causing it to work less well when you reuse the bottle. Before reusing the bottle, we recommend you rinse the nozzle with hot tap water by running the water through the air holes in the side of the foam pipe. Spray *HG eco oven cleaner* onto the surface that requires cleaning. When treating stainless-steel parts, treat the complete surface to prevent colour differences. Leave the product to work for 3-5 minutes. If necessary, scrub with a wet sponge. Then wipe off the surface with a sponge. After all the grease has been removed, clean the oven once more with hot water! If necessary, repeat the treatment several times on barbecue grills and oven trays. If the results are still disappointing, we advise heating the surface to be cleaned until it is warm to the touch. Check the temperature of the surface before applying the *HG eco oven cleaner*. It should not exceed $\pm 30^{\circ}\text{C}$. Now treat the surface as previously described. Turn the nozzle a quarter turn after use (OFF).

Caution: Transport and store the bottle upright. Not suitable for use on untreated aluminium on the outside of the oven, grill or barbecue. Wear suitable gloves during the treatment. Before use, check the instructions for your device. Prevent any liquid from running onto worktops, but should this happen clean it immediately with plenty of water. Too high a temperature in combination with HG eco oven cleaner may damage the surface.
