**HG anti-slip for rugs,
carpet strips and mats
(HG product 96)**

HG "anti-slip for rugs, carpet strips and mats" is the solution to prevent carpets from slipping and to avoid slipping over mats, including bath mats. This unique formula roughens the underside and stops carpets, runners and mats from slipping without sticking them to the floor. This product is suitable for virtually any type of carpeting or mat and can be used on just about any surface.

Directions for use: HG "anti-slip" is suitable for carpets and runners with a plastic or jute back and for mats without an anti-slip underlay. The product can be used on all sorts of (non-porous) stone, laminate, parquet, etc. The surface being treated must be clean and dry. First of all vacuum clean the floor if necessary. Also test an inconspicuous part of the material for colour fastness. Turn the nozzle on the front side a quarter. Spray the underside of the carpet or mat copiously and evenly and leave to dry. Wipe off spilt drops straight away with plenty of water so that no stains are left. Before turning the carpet or mat over and walking on it, we recommend leaving it to dry overnight (or for at least 2 hours), or speeding up the drying process by using a hair dryer. Whichever drying method you use you should not turn the carpet or mat until the HG "anti-slip" is completely dry (it is still be sticky, but does not come off). Turn the nozzle a quarter after use (OFF). The roughness of HG "anti-slip" will wear off after some time. When that happens you should repeat the treatment. HG "anti-slip" can be washed using a main wash powder or liquid at 40° - 60° C. Always remember to read the washing instructions on the carpet or mat first. Instead of spraying straight onto the material, it is also possible to spray both sides of a piece of plastic (such as a bin liner) and place it under the carpet or mat once it has dried. That way, contact between HG "anti-slip" and the carpet or mat is avoided.

Consumption: 500 ml is enough for 2 - 3 m².

Attention: Transport and store the bottle upright. Clean up spilt fluid straight away. Rinse the spray nozzle after use with cold water in order to prevent it from blocking. If the fluid comes into contact with your skin, wash it off with soap and water immediately. Residues of HG "anti-slip" may be left on floors that have been polished (e.g. with HG "protective coating satin finish" (HG product 14) or HG "laminare protective coating gloss finish" (HG product 70)). These residues can be removed by rubbing them with a clean cloth or with a remover or power cleaner from the HG range that is suitable for the surface. Keep in frostfree area. P101 - If medical advice is needed, have product container or label at hand. P102 - Keep out of reach of children. • Medical personnel can request the data sheet via +31 (0)36 54 94 777 • The consumer's information sheet can be obtained via www.HG.eu
