Drain and plug unblocker gel

Super fast - result in 5 minutes

Dissolves stubborn blockages

Absolutely no splashing

1000 ml e

HG drain and plug unblocker gel

- absolutely no splashing at all
- result after just 5 minutes
- no hot water needed
- for all types of drains*
- ready to use

HG drain and plug unblocker gel is a unique, safe and extremely powerful unblocker that can be used immediately. The gel is firm and bonds, which prevents splashing. Its weight - the gel is much heavier than water - ensures it sinks, without dissolving, through the water to the blockage where it does its job. In contrast to granule-based unblockers, this product cannot worsen the blockage and cannot affect plastic drains.

Directions for use: Carefully pour 500 ml of *HG drain and plug unblocker gel* down the blocked drain. Leave it to work for 5 minutes, and rinse with plenty of water. In case of a persistent blockage when the drain does not drain at all, let the sink or basin run full of warm water. Add 500 ml *HG drain and plug unblocker gel* to this water and leave it overnight. Check the cleaning instructions for your sink or basin first, as some materials may not be resistant to the impact of our product. Rinse thoroughly with hot water the next morning. Preferably use *HG kitchen drain and plug unblocker* for persistent blockages caused by food remnants and grease. For blockages caused by hair, we recommend *HG drain and plug hair unblocker*.
