WEATHERED WOOD RESTORER

sanding is no longer required

500 ml e

HG weathered wood restorer

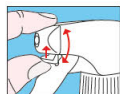

- sanding is no longer required
- leaves wood white and clean
- ideal as pre-treatment for *HG hardwood colour restorer*

New teak or other hardwood garden furniture always looks wonderful because of its natural warm finish. However, once furniture has been out in all kinds of weather for a season, this warmth has been replaced by a tired grey sheen. Sanding down the furniture to remove this dullness is an unpleasant task. This is why we have developed *HG weathered wood restorer*. *HG weathered wood restorer* cleans and restores faded/grey hardwood furniture in a single simple treatment to its original beauty. After this the *HG hardwood colour restorer* can be applied, to protect the wood and restore the natural warm look of the wood. *HG weathered wood restorer* can also be applied to other wood types (e.g. maranti, mahogany, pine, etc.) as well as cane, rattan and bamboo furniture.

Directions for use: Remove the locking clip before use. Press the nozzle at the front side and turn a quarter. After the preparation (see attention), spray the surface to be treated with the *HG weathered wood restorer* (beware of spillage on clothes: it will cause bleach stains!). Allow to penetrate for 10 minutes, you will see the wood loose its greyness. The loosened dirt can be removed using a brush or a sponge and lots of water; it is advisable to use a hose or watering-can for this. Do not use a pressure hose! Allow the furniture to dry thoroughly before applying the *HG hardwood colour restorer*. Turn the nozzle a quarter backwards after use (blocking position).

Coverage: 2-3 garden chairs per 500 ml depending on the degree of dirt.

Attention: Place the furniture to be treated on a hardened surface (e.g. terrace or driveway) that has good drainage possibilities. Be careful on coloured tiles in case of possible bleaching! Do not use on coloured concrete tiles. **Transport and store cool, dark and in an upright position.** Before starting the treatment, cover all metal parts of the furniture to be treated. • Medical personnel can request the data sheet via +31 36 54 94 777 • The consumer's information sheet can be obtained via www.HG.eu

contains a.o.:

anionic surfactants, chlorinebased bleaching agents < 5%

Biodegradable according to regulation 648/2004/EC

DANGER H314- Causes severe skin burns and eye damage.

H410- Very toxic to aquatic life with long lasting effects.

EUH206- Warning! Do not use together with other products. May release dangerous gases (chlorine). **P101-** If medical advice is needed, have product container or label at hand. **P102-** Keep out of reach of children.
