# Waterproof for clothes and fabrics

Waterproof in a single wash

Clothing stays dry and clean every time it rains

300 ml e

## HG waterproof for clothes and fabrics

- for washing by hand and in the machine
- ideal for coats and raincoats

*HG waterproof for clothes and fabrics* has been developed especially to make cotton, linen, wool and mixed fabric types (they are fabric types made of a mix of natural materials, such as cotton, and synthetic materials, such as polyamide or polyester) water-repellent and dirt-repellent. This product is therefore ideal for making coats and raincoats, but also jeans for example, water-repellent and dirt-repellent. This highly concentrated product is easy to use too. The content of this bottle is enough for maximum 3kg of fabrics.

Please use the hand-wash method to obtain the best results.

Directions for the hand-wash method:

1. The garment that requires treatment must be clean and dry.
2. Fill a bucket, bowl or sink with approximately 6 litres of lukewarm water.
3. Mix the whole content of this bottle with the lukewarm water.
4. Add the garment to the solution and turn it regularly for 15 minutes.
5. Then rinse with cold water.

**Directions for the washing machine:**

1. The garment to be treated must be clean and dry.
2. The detergent tray of the washing machine must be completely free from detergent remnants. Clean it first if necessary, because detergent diminishes the effectiveness of *HG waterproof for clothes and fabrics*.
3. Select the dark-laundry programme (no pre-wash) or if the care label of the garment recommends it, the delicate fabrics or wool programme (no pre-wash). Do not add detergent or fabric softener. Set the temperature in accordance with the care label of the garment, but it may not exceed 40°C.
4. Start the washing machine and after approximately 15 sec add the whole content of this bottle to the water running through the detergent tray. If you do not wait for these 15 seconds and add the product too early, it may end up directly in the drain because the washing machine pumps away water during the first few seconds of a new programme. (Do not use the product in a dosing ball.)
5. Leave the cycle to complete.
6. **The effect of this product is enhanced by heat.** Therefore iron the fabric before it is fully dry or dry it in a tumble-drier. However, do check the care label of the fabric to ensure it can be ironed or tumble-dried. Otherwise hang it up on the washing line.

**Attention:** If you wash this garment after it has been treated with this product, the protection reduces. For optimum protection we recommend repeating the treatment with this product after washing. Keep in a frost-free area.
