500 ml e

HG ironing spray

- also suitable for silk
- makes ironed fabrics supple, soft and resilient

Ironing becomes a pleasure with *HG ironing spray*. It enables you to iron even the most crinkly fabric types, such as silk, linen and viscose smoother than ever before. A perfect smooth result is obtained with both natural and synthetic fabrics. It also adds a fresh fragrance and makes it possible to iron at a lower temperature. That makes the fabric last longer, reduces power consumption and prevents the surface of the iron from getting dirty.

Directions for use: Turn the nozzle on the front a quarter turn. Set the iron to the right temperature for the type of textile being ironed. Gently shake *HG ironing spray*, hold the bottle at a slight angle and spray the fabric from a distance of about 20 cm. Slightly moisten the fabric (moisten only very slightly for silk and wool). Then iron the laundry straight away until the desired result is achieved. Treat stubborn folds and creases twice. Turn the nozzle a quarter-turn after use (OFF).
