HG eco limescale remover

- Packaging made of 100% recyclable materials.
- **FREE FROM** preservatives, phosphates, phosphonates, colourings and microplastics.

HG eco limescale remover removes limescale from all surfaces quickly and effectively. It simply leaves a brilliant shine!

HG eco limescale remover is a sustainable descaler. HG eco products are free from preservatives, phosphates, phosphonates, colourings and microplastics. Ingredients such as allergens, parabens and chlorine are also excluded from the HG eco range. Packaging made of 100% recyclable materials. In brief: HG eco products are sustainable products, but with the familiar HG performance and effectiveness!

Instructions: Push in the nozzle on the front and turn a quarter turn. If you have used the bottle before, remnants of the liquid may be left in the nozzle, causing it to work less well when you reuse the bottle. Before reusing the bottle, we recommend you rinse the nozzle with hot tap water by running the water through the air holes in the side of the foam pipe. Spray on **HG eco limescale remover** and leave to work for a while. Then rinse off or wipe it with a damp cloth. In the case of stubborn limescale, leave the limescale remover to work longer. Do not leave the product to work for longer than 5 minutes and do not let it dry out. Repeat the treatment as required. Turn the nozzle a quarter turn after use (OFF). Regular use of **HG eco limescale remover** prevents limescale from building up, so that your sanitary appliances always look brilliantly clean.

Cautions: Transport and store the bottle upright. Besides the familiar silver-coloured ~~sanitary ware~~ (made of chrome), there is now also sanitary ware of different colours that is not acid-resistant. Before using this product, check the manufacturer's maintenance instructions for the sanitary ware. Do not use **HG eco limescale remover** on calciferous types of natural stone, such as marble, or non acid-resistant surfaces. Ventilate well during use.
