

HG laminate, vinyl and PVC cleaner extra strong (product 74)

- removes stubborn dirt and grease

HG laminate, vinyl and PVC cleaner extra strong is a powerful cleaner for safe and effective removal of stubborn dirt, grease and protective films.

Directions for use:

For normal powerful cleaning:

Dissolve 1 litre in half a bucket (5 l) of lukewarm water and apply with a well wrung-out floor cloth or mop, rinsing it regularly in the solution. Do not rinse or mop dry, simply leave the floor to dry on its own.

To remove protective coatings:

Pour the undiluted product into a bucket and then apply using a well wrung-out mop or floor cloth. The floor must not be made too wet (see Caution). Leave to penetrate for a few minutes and then scrub with a scrubbing brush or stiff broom if required. Wipe up the liquid with a clean and well wrung-out mop, regularly rinsing it in clean water. Finally, mop the floor once or twice again with a well wrung-out mop and clean water.

Use:

± 10-15 m² per litre undiluted, ± 25-50 m² per litre diluted.

Caution:

Never use too much water when cleaning the floor, as the seams may swell when wet.
