JEWELLERY CLEANING BATH

restores the
original
shine

300 ml e

HG jewellery cleaning bath

- restores the original shine
- removes dirt quickly and efficiently
- ideal for all your jewellery & dress jewellery
- includes tweezers and brush

Skin grease, in particular, ensures that jewellery becomes dirty. Although skin grease alone has no colour and only makes your jewellery somewhat duller it can be very stubborn and retain other dirt, making the marks visible and the jewellery look dirty. Using a simple, thorough and sophisticated cleaning process, the *HG jewellery cleaning bath* removes the dirt quickly and efficiently.

Directions for use: Immerse the jewellery for 3-5 minutes, depending on the amount of dirt. Remove from the fluid (with the help of the tweezers if necessary). Use the brush supplied to apply extra cleaning to any parts that may be difficult to get to. Rinse the jewellery under the tap and dry with a clean non-fluffy cloth. **Transport and store the jar upright.** • Medical personnel can request the data sheet via +31 36 54 94 777 • The consumer's information sheet can be obtained via www.HG.eu
