### HG tile stain remover (product 21)

- for grease and oil stains
- for porous flagstone, natural stone and concrete

For the removal of grease and oil stains from tiles, paving stones, natural stone, concrete and cement. *HG tile stain remover* is also suitable for removing epoxy grouting residues.

#### Directions for use:

**To remove spots:** Shake *HG tile stain remover* well and pour it over the areas to be treated. In case of severe staining this product can be used undiluted. For less severe staining *HG tile stain remover* can be diluted to a maximum of 1:5 with (preferably) warm water. Scrub with a stiff broom or a brush. Leave to penetrate for 5 to 10 minutes and then rinse with plenty of water. For very absorbent sur-faces the treatment may need to be repeated once or twice.

**To remove epoxy grouting residues:** Shake *HG tile stain remover* well before using and apply undiluted. Scrub briefly and then leave to penetrate for about 20 minutes and scrub again. Rinse with plenty of water.

**Attention: Transport and store the bottle upright.** If the floors have a protective coating, that coating may also be removed by *HG tile stain remover*. Apply (to the affected areas) a new protective coating after the treatment with *HG tile stain remover*. Avoid spattering onto painted or varnished surfaces. Remove spilled liquid immediately with plenty of water. Ventilate well when using this product.
