HG parquet and wood cleaner extra strong (product 55)

- removes stubborn dirt and grease

HG parquet and wood cleaner extra strong has been specially developed for the fast, easy and safe removal of stubborn dirt and grease from all types of parquet and wooden flooring. It is also suitable for removal of polish and other protective films.

Directions for use:

For normal powerful cleaning:

Dissolve 1 litre in half a bucket (5 l) of lukewarm water and apply with a floor cloth or mop. Leave to work for approximately 5 minutes. Then scrub the surface carefully with a soft scrubbing brush, if necessary. Then remove the solution from the surface with a floor cloth or mop, regularly rinsing it in water and wringing it out. (A water extractor can be used if required.) After that, thoroughly mop the floor again with clean water.

To remove stubborn dirt or old polish or other protective films: Use this product undiluted. Follow the steps described above.

Use: $\pm 10\text{-}15\text{ m}^2$ per litre undiluted, $\pm 25\text{-}50\text{ m}^2$ per litre diluted.

Caution: If you clean too wet, the seams may swell up.
