DISHWASHER CLEANER AND ODOUR FRESHENER

improves hygiene

HG dishwasher cleaner and odour freshener

- improves hygiene
- in a full or an empty dishwasher
- for a clean and fresh dishwasher
- sufficient for approximately 12 treatments

Dishwashers do not always smell fresh and at times the smell gets really bad. This is caused by grease, food and soap deposits in the drains, on the filters and on the rubber seals. *HG dishwasher cleaner and odour freshener* removes those deposits effectively and produces a dishwasher that smells wonderfully fresh again for a long period of time. Using this product also improves hygiene and produces cleaner dishes. Because of its unique formula this product can be used in a full or an empty dishwasher.

Directions for use: For the best results we recommend using this product in an empty dishwasher.

Use in an empty dishwasher: Add 4 caps (40 gram) of powder to the detergent tray. Let the empty dishwasher run through a normal cycle (approximately 50°C). Repeat the treatment 1x every 2 weeks.

Use in a full dishwasher: Add 4 caps (40 gram) of powder to the detergent tray and put the detergent tablet in the cutlery tray or basket. Then let the dishwasher complete a normal programme (approximately 50°C). Repeat the treatment 1x a week.

Attention: If you use this product in a full dishwasher we recommend you do not put plastic objects in the dishwasher. If the dishwasher continues to smell after using this product, or the smell returns within 1 or 2 days, we recommend cleaning it thoroughly with *HG washing machine and dishwasher deep clean and service*. By using *HG washing machine and dishwasher deep clean and service* 1x every 3 months, you prevent wear and tear to the components and malfunctioning of the dishwasher.
