toilet cleaner gel super powerful

does not affect the glaze at all

500 ml e

HG toilet cleaner gel super powerful

- does not affect the glaze at all
- extremely powerful, removes even the most stubborn scale and deposits

Difficult to remove deposits can form in any toilet. Problem dirt such as persistent limescale, urine stains, or other difficult to remove deposits occur on the inside of the toilet bowl, but also in the neck or invisibly under the rim. The dirt under the rim means the toilet is never hygienically clean – it can cause a musty odour and it reduces the flush action of the toilet. The specially developed formula of *HG toilet cleaner gel super powerful* adheres to the surface of the toilet bowl and ensures an effective removal of all problem dirt. **This product does not contain hydrochloric acid, because that substance affects the glaze of your toilet pan and makes it rough. Furthermore, hydrochloric acid gives off vapours that affect and damage the surface of stainless steel and chrome in your bathroom. In other words, HG toilet cleaner gel super powerful is safe for glaze, stainless steel and chrome.**

Directions for use: Squeeze the sides of the lid and simultaneously turn the lid to open. Spray *HG toilet cleaner gel super powerful* deep under the rim of the toilet bowl and in the bowl. Leave the gel to work at least 20-30 minutes and then brush the toilet bowl clean with a toilet brush. Finally flush the toilet.

Attention: Transport and store the bottle upright. This product is not suitable for **porcelain** surfaces. Prevent contact with marble and other chalky surfaces. Rinse the toilet brush properly after use. For regular cleaning of the toilet bowl, it is best to use *HG toilet cleaner gel hygienic*. For quick daily and hygienic cleaning of everything in the toilet area, such as the seat, the outside of the bowl, the cistern, the hand basin, the tap, and even the door handle, we recommend *HG sanitary area cleaner*.
