limescale remover concentrate

removes stubborn
scale quickly and
thoroughly

1000 ml e

HG limescale remover concentrate

- removes stubborn scale quickly and thoroughly
- super concentrated

An extremely powerful product to remove persistent limescale, rust stains, yellow stain deposits and copper oxide. *HG limescale remover concentrate* is however safe for all the materials that are used in a bathroom or toilet, such as chrome, stainless steel, ceramics, glaze, glass, crystal and various types of plastic.

Dosage: Depending on the degree of soiling, use undiluted or dilute up to 1:10. For bathtubs always dilute 1:10.

Directions for use: Test *HG limescale remover* with a sponge on a small and inconspicuous place first. Apply with the *HG sanitary sponge*. Leave to work for a few minutes, then wipe/rinse off with water. Repeat the treatment if necessary. Immerse badly functioning shower heads in *HG limescale remover* for 30 minutes and finish off by brushing. Afterwards rinse off thoroughly with water.

Attention: Transport and store the bottle upright. Besides the familiar silver-coloured sanitary ware (made of chrome), there is now also sanitary ware of different colours that is not acid-resistant. Before using this product, check the manufacturer's maintenance instructions for the sanitary ware. Do not use on marble, travertine, granito, blue Belgian limestone and other types of calciferous natural stone, vulnerable paintwork, lead glazed materials and non-acid resistant bathtubs or other non-acid resistant surfaces.
