UNBLOCKER

1000 ml e

HG unblocker

HG unblocker is an extremely powerful unblocker, but safe for the drains*. As the product is ready for use, it does not need to be diluted, which means there is much less chance of splashing.

Instructions: Carefully pour 500 ml of *HG unblocker* down the blocked drain. Leave it to work for at least 5 minutes and rinse with plenty of water. In case of a stubborn blockage when the drain does not drain at all, let the sink or basin run full of warm water. Add 500 ml of *HG unblocker* to this water and leave it overnight. Next morning rinse it with hot water. As *HG unblocker* is heavier than water, it sinks through the water to the blockage. The combination of the product and the water pressure will remove the stubborn blockage.

Caution: Transport and store the bottle upright. This product is not suitable for septic tanks. ***Not suitable for aluminium or zinc drains.** Does not remove blockages caused by cement or metal objects.
