and helmets

500 ml e

HG car insect remover

- also for motorcycles and helmets
- removes even the worst insect residues
- also ideal as a pre-treatment at the car wash

Insect remnants caked onto your bonnet, bumper and windscreen are hard to remove by normal washing or in the car wash. Extra hard rubbing with a sponge or brush will result in the car paint being damaged. This problem is solved quickly and effectively with *HG car insect remover*. This unique product softens the caked-on, dried-out insects, which makes them very easy to remove. Safe for all of your car's bodywork. Also suitable for motorcycles/mopeds and helmets.

Directions for use:

1. Turn the nozzle on the front side a quarter.
2. Thoroughly spray the insects;
3. Leave *HG car insect remover* to penetrate for a few minutes;
4. Wash the car in the usual way.
5. Turn the nozzle a quarter after use (OFF).
