# Limescale remover concentrate

## Up to 100% limescale removal

Powerful, safe clean shine

Super concentrated

### HG limescale remover concentrate

- removes stubborn scale quickly and thoroughly
- super concentrated

An extremely powerful product to remove persistent limescale, rust stains, yellow stain deposits and copper oxide. *HG limescale remover concentrate* is however safe for all the materials that are used in a bathroom or toilet, such as chrome, stainless steel, ceramics, glaze, glass, crystal and various types of plastic.

**Dosage:** Depending on the degree of soiling, use undiluted or dilute up to 1:10. For bathtubs always dilute 1:10.

**Directions for use:** Test *HG limescale remover* with a sponge on a small and inconspicuous place first. Apply with a sanitary sponge. Leave to work for a few minutes, then wipe/rinse off with water. Repeat the treatment if necessary. Immerse badly functioning shower heads in *HG limescale remover* for 30 minutes and finish off by brushing. Afterwards rinse off thoroughly with water.

**Attention:** Transport and store the bottle upright. Besides the familiar silver-coloured sanitary ware (made of chrome), there is now also sanitary ware of different colours that is not acid-resistant. Before using this product, check the manufacturer's **maintenance instructions for the sanitary ware**. Do not use on marble, travertine, granito, blue Belgian limestone and other types of calciferous natural stone, vulnerable paintwork, lead glazed materials and non-acid resistant bathtubs or other non-acid resistant surfaces.
