HG silver polish

- does not scratch at all
- for a brilliant shine

HG silver polish is a very sophisticated, modern polishing product. Rather than actually polishing, the specially selected polishing agents allow deposits to be simply rubbed away. *HG silver polish* does not scratch and is therefore safe to use on all solid silver and silver plated objects. Due to the handy, dosing pump it is clean, easy and economical to use.

Instructions for use: If necessary, remove protective layers beforehand with acetone. Shake the bottle well before use. Apply a small quantity of *HG silver polish* on a (soft) polishing cloth and then rub lightly onto the object. While rubbing, dirt such as black deposits will be removed. Allow the cream 1 minute to dry in and then lightly polish it until the cream has been entirely removed. Regularly use a clean area of the cloth.

Attention: Transport and store the bottle upright. Keep in a frost-free area. Do not rub the surface of antique silver objects with *HG silver polish* if the surface has a patina that should not shine. Refit the clear plastic cover fully back over the top of the bottle after use to avoid the product drying in the pump mechanism. • Medical personnel can request the data sheet via +31 36 54 94 777. • The consumer's information sheet can be obtained via www.HG.eu

WARNING H315- Causes skin irritation. **H319-** Causes serious eye irritation. **P101-** If medical advice is needed, have product container or label at hand. **P102-** Keep out of reach of children. **P264-** Wash hands thoroughly after handling. **P302+P352-** IF ON SKIN: Wash with plenty of soap and water. **P305+P351+P338-** IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. contains a.o.: < 5% non-ionic surfactants
