500 ml e

HG awning and tent cleaner

- cleans quickly and easily
- to freshen up quickly and conveniently

For simple and quick freshening up of awnings, canopies, tent (extensions), beach screens, canvas (tarpaulin) covers, gazebos and party tents.

Directions for use:

Use during calm weather. Turn the nozzle on the front side a quarter. First moisten the surface to be cleaned with water. Spray the liquid evenly on the surface and scrub well with a clean brush or broom. Leave to work for at least 5 minutes and make sure it does not dry out. If any part dries out, moisten locally with water (for example with a plant spray). Prevent diluting the product too much and prevent it from running off. After leaving the product to work, scrub the surface once more and rinse it thoroughly with water. Turn the nozzle a quarter after use (OFF).

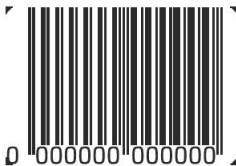

Tip:

If certain parts of the surface are difficult to reach, for example large awnings, the liquid may also be applied with a handheld pressure sprayer with a long wand. Empty the bottle in a clean sprayer and spread the product evenly over the surface that requires cleaning. After use, rinse the handheld sprayer thoroughly with clean water.

After treating with *HG awning and tent cleaner*, we advise waterproofing your canvas/tarpaulin with *HG 4-in-1 protector for textiles*.

Use:

1 bottle is enough for maximum 10 m²

Attention:

Transport and store the bottle upright. Always test a small, inconspicuous patch of the canvas/tarpaulin for colour-fastness first. Make sure the canvas/tarpaulin stays moist throughout the soaking period. Do not apply and leave in direct sunlight. To prevent mould stains, never roll up the canvas/tarpaulin while wet. This product does not restore discolouring and does not remove mould stains. During application, prevent liquid from coming into contact with blank metal. If any liquid is spilled, rinse immediately with plenty of water. Keep in a frost-free area.
