### HG polish cloth

- suitable for gold, silver and copper
- large format cloth

The special impregnated *HG polish cloth* is made of a top-quality type of fabric and contains cleaning and shine-restoring components. It means that you can return the colour and shine to silver or copper objects, but also to gold and jewellery. With these extra-large cloths (30 x 30 cm), you don't have to touch the objects with your hands and that prevents them becoming dirty again quickly.

**Instructions:** Polish the surface with the *HG polish cloth* until it starts to shine. If there are any deposits that are difficult to remove, moisten the tip of the polish cloth and remove the deposit. The polish cloth is reusable and retains its polishing power until it is completely worn, even when it has become completely black.

**Caution:** Do not wash the polish cloth.

Medical personnel can request the data sheet via +31 36 54 94 777. The consumer's information sheet can be obtained via [www.HG.eu](http://www.HG.eu)
