## air neutraliser for bad odours

does not mask  
but removes  
the odour

400 ml e 650 3

### HG air neutraliser for bad odours

- does not mask but removes the odour
- a natural cleaning process based on plant extracts

*HG air neutraliser for bad odours* is a non-damaging, water-based plant extract that quickly, safely and effectively neutralises the most difficult odours leaving a clean and healthy environment. The product does not contain CFC's or other damaging aerosol gases and is therefore environmentally friendly, 100% bio-degradable and not harmful to eyes, skin or materials. The can is very easy to use. As it works under air pressure, it sprays very well and in all positions.

**Directions for use:** Spray *HG air neutraliser for bad odours* liberally in the area required to be neutralised. After 15 minutes the air should be clear again. Repeat the process for persistent unpleasant smells. If after two treatments the smell has not been neutralised then check the area for any source that may be causing the smell. Once found the source can be tackled with *HG odour eliminator for all surfaces*.
