## window cleaner concentrate

guaranteed streak-free windows

500 ml e

### HG window cleaner concentrate

- guaranteed streak-free windows
- super concentrated
- sufficient for at least 35 washes
- professional window cleaners use it with good reason!

*HG window cleaner concentrate* is a super concentrated product that cleans and degreases without streaks, but does not contain ammonia or spirits. No wonder professional window cleaners use this product. *HG window cleaner concentrate* exceeds every professional requirement – this HG product has a neutral pH, which means it is safe for paint, lacquer and plastic and very mild to the skin.

**Directions for use:** Use 15 ml (approx. 2-3 teaspoons) of *HG window cleaner concentrate* in half a bucket of lukewarm water (approx. 5 litres). Change the water more frequently for particularly dirty windows. Use undiluted *HG window cleaner concentrate* on very dirty spots. Apply an amount of *HG window cleaner concentrate* on a cloth or on the surface to be treated. Leave it for a little while and then wipe it off with a sponge or a damp cloth. Wash your windows with circular movements for the best results. Use overlapping strokes when you dry your window with a squeegee. Dry the squeegee with a dry cloth before using it again. Never clean your windows in direct sunlight.
