## CAR WINDSCREEN DE-ICER

prevents rapid  
refreezing

### HG car windscreen de-icer

- prevents rapid refreezing
- never scrape again
- works quickly and effectively

*HG car windscreen de-icer* removes all snow and ice from windscreens very quickly and effectively. Even heavily frozen windows are de-iced in a flash! This does away with the need to scrape windows and consigns driving with limited vision – which can lead to dangerous situations – to the past. *HG car windscreen de-icer* also prevents rapid refreezing.

**Directions for use:** Turn the nozzle on the front side a quarter. Spray *HG car windscreen de-icer* evenly onto the car windows and leave to penetrate for a few seconds until the snow has disappeared and the ice has melted. Very thick layers of snow should be brushed off before using *HG car windscreen de-icer*. Turn the nozzle a quarter after use (OFF).

**Tip:** Also thoroughly spray the windscreen wipers with *HG car windscreen de-icer*. To avoid damaging the wiper blades, make sure that your windscreen wipers have been de-iced before operating them. **Transport and store the bottle upright.**
