## Grout cleaner

### Extremely powerful cleaning

Cleans and restores grout colour  
Suitable for wall and floor grout

500 ml e

### HG grout cleaner

- extremely powerful
- restores the colour of the grout
- ready to use

**HG grout cleaner** is a powerful and 'buffered' cleaning agent. These properties ensure that it retains the same powerful effect during soaking and brushing, which produces a fantastic result. This product can be used on nearly all types of grout between wall tiles, floor tiles and brick.

**Directions for use:** Remove the locking clip before use. Press the nozzle at the front side and turn a quarter. Spray the grout thoroughly, leave the product to work for a few minutes and then brush the grout with a brush. Finally wipe off the loose dirt with clean lukewarm water and leave to dry. Repeat the treatment if necessary. Turn the nozzle a quarter backwards after use (blocking position). Grout in shower cubicles and bathrooms is often dirty because of scale. In that case you should use **HG limescale remover**. For black deposits on grout (mould), please use **HG mould spray**.

contains a.o.:

anionic surfactants, non-ionic surfactants, phosphonates	< 5%

**Attention: Transport and store the bottle upright.** It is recommended to test this product in an inconspicuous place first. Not suitable for gloss surfaces, surfaces that are sensitive to acids, or grout treated with gloss paint. Not suitable for grout between calciferous tiles (marble etc.). Use **HG natural stone bathroom cleaner** for those. Silicon joints will not always produce an optimum result.
